# Printings

## Z1 Sublimation printing

Available color possibilities:  
**Any pantone** 

Number of simultaneous color printing:  
**Full color**

Lead time: **1-14 working days**

Minimum quantity: **100 pieces.**

Sublimation printing is a printing technique that uses the phenomenon of sublimation. Print (CMYK) is made with special ink on transfer paper and then, under a high pressure and temperature, it is transmitted to the object coated with varnish polyester. Each type of printing requires a setting of pressure, temperature and time. For example, for printing on aluminum gadgets via press using thermal transfer pressure 5000 Pa at a temperature of 195 ° C for about 40 seconds.

## Z2 Silk printing

Available color possibilities:  
**Any pantone** 

Number of simultaneous color printing:  
**1-4 colors**

Lead time: **1-14 working days**

Minimum quantity: **100 pieces.**

The method of transfer printing (silk printing) allows precise mapping of characters up to 1-4 colored graphics in terms of maintaining all the details and 100% depth of color. Thanks to modern technology, we performed imprint characterized by high quality and durability.

## Z3 Flock printing

Available color possibilities:  
**see page 30.**

Number of simultaneous color printing:  
**1 color**

Lead time: **5-15 working days**

Minimum quantity: **100 pieces.**

Printing is very soft and pleasure in touch, perceptible under the finger.  
 Flock thickness: 5 mm  
 Recommended to be used for simple projects.  
 24 colors available for logo flock imprint.

## Z4 Reflective printing

Available color possibilities:  
**Any pantone** 

Number of simultaneous color printing:  
**1-3 colors**

Lead time: **5-14 working days**

Minimum quantity: **1000 pieces.**

Used in combination with the silk printing technique, involves applying reflective paint layer on the logo. The technique is applicable to projects containing smaller amount of colors. For the best effect up to 1-3 colors is recommended.

# Printings

## Z5 Fluorescent printing

Available color possibilities:  
**White/ fluorescent**

Number of simultaneous color printing:  
**1 color**

Lead time: **7-14 working days**

Minimum quantity: **1000 pieces.**

Printing is slightly noticeable under the finger as it allows very precise mapping of artworks containing small details. Thanks to its properties after printing exposure to light shines in the darkness.

## Z7 Engraving

Possible colors of the logo:  
depending on the substrate  
**white, silver or gold**

Number of simultaneous color printing:  
**1 color**

Lead time: **1-7 working days**

Minimum quantity: **100 pieces.**

Technique consists of applying a design on the surface of the object with a laser. Laser engraving can be placed on objects made of different kinds of materials, such as metals, ceramics, glass, plexi glass, polyethylene, silicone, leather, rubber, wood, and many others.

## Z8 Embossing

Number of simultaneous color printing:  
**1 color**

Lead time: **5-14 working days**

Minimum quantity: **100 pieces.**

The embossing operation is accomplished with a combination of heat and pressure on a material (plastics, leather, etc.) making the desired pattern look three-dimensional. It is considered as one of the more noble methods of branding.

## Z6 Woven

Available color possibilities:  
**Any pantone** 

Number of simultaneous color printing:  
**1 -4 colors**

Lead time: **10-20 working days**

Minimum quantity: **1000 pieces.**

Branding technique characterized by excellent quality. It is recommended for weaving simple designs with no fine details. Applicable up to 1 - 4 thread colors. Threads used in this technique are available in each color on Pantone scale.

## Z9 Gold or Silver printing

Available color possibilities:  
**Gold/Silver**

Number of simultaneous color printing:  
**1-2 colors**

Lead time: **5-14 working days**

Minimum quantity: **100 pieces.**

Golden or silver like color, soft in touch printing effect. Perceptible under the finger. Recommended to be used in simple, but extraordinary projects. Can be combined with max 2 other printing colors

## Z10 3D printing effect

Available color possibilities:  
**Any pantone** 

Number of simultaneous color printing:  
**1-4 colors**

Lead time: **14-21 working days**

Minimum quantity: **1000 pieces.**

The method of 3 D printing allows precise mapping of characters up to 1-4 colored graphics in terms of maintaining all the details and 100% depth of color. High quality 3D printing. Extraordinary design, elegant finish. Printing thickness: 1 mm
