

NEW

Your partner in promotional bottles!

You may already have used a Bottle Promotions sports bottle. It wouldn't be surprising, as we have been the sector specialist in the production and printing of drinking bottles for more than 25 years. Our factory, which has been awarded Sedex certification, is equipped with state-of-the-art injection moulding machines that produce high-quality drink bottles. The bottles then go to our ISO-certified printer, who completes them with printing of the same top quality. The entire production process is carried out in the Netherlands, where our enthusiastic and dedicated team are ready to deliver your powerful promotional product. This, together with our good price/quality ratio and short delivery times, enables us to distinguish ourselves from the competition!

In this brochure you find information about our bottle range and accessories. We manufacture three bottle models: The Fuse, Shiva and Source. These are all available in a range of versions.

NEW

Bio bottle

The Bio Bottle is made from biodegradable plastic that degrades naturally. Composting begins in a landfill facility, the process takes 1-5 years. Custom colours available from 5.000 pcs. Attention! Other cap options are possible, but they are not bio!

Fuse Bio is 75% biodegradable.

Shiva O2

white

Original
screw cap

white

This bottle is made from sugarcane. Sugarcane is a renewable raw material that contributes to the reduction of greenhouse gas emissions!
It's actually quite simple: growing sugarcane captures CO2 from the air. Ethanol extracted from the sugar cane is used to make 'green' plastic that is 100% recyclable.

**Do you want to help improve the environment?
If so, you should opt for the Shiva O2!**

Silk screen prints

For each print colour we make an individual screen.

We can print up to 12 colours (our state of the art printing machine prints 6 colours in one production run).

File specifications

- Adobe Illustrator 8.0 or higher (eps or vector ai file)
 - Adobe Photoshop 5.0 or higher (or Adobe In-Design)
- Per email, max.10 MB or via We Transfer.

Fonts

Mac user: please put the letter type in outline and send us the Fonts.

PC user: always change letters into outline.

Print area

- Bidon 450cc: 198 x 147 mm
- Bidon 500cc: 235,5 x 100 mm
- Bidon 750cc: 235,5 x 100 mm & 235,5 x 22 mm (upper print area)
Distance between upper and lower part of imprint of the 750ml bottle is 95 mm (heart to heart print)

Full colour process print: CMYK

It could be, that part of the design has to be made up in CMYK and additional pantone colours. For example, text with a specific colour must be made up in an extra spot colour.

Therefore, to ensure your calculations are correct, please always send us the artwork to review the number of colours required.

Printing full colour

When printing a multiple colour design, where the colours meet a 0,5 mm tolerance in closure must be accepted. When printing full colour process CMYK, the end result is mat, pixelated and can deviate from the visual proof. Our raster size is 34 dpi.

Printing on coloured bottles

To print a pantone colour onto a coloured bottle, it's necessary to print a white underlay first. No white underlay is required for grey tints, gold, silver and white. In some cases an outline is visible and has to be accepted. The white underlay is calculated as one extra print colour and one extra screen. If white is already part of the design, there is no extra white underlay required. If in doubt, please contact us for information.

Dark bottles

Dark bottles are more sensitive to scratches and scuff marks.
